Tedburn St Mary Primary School: Number & Calculation policy: Years 1&2

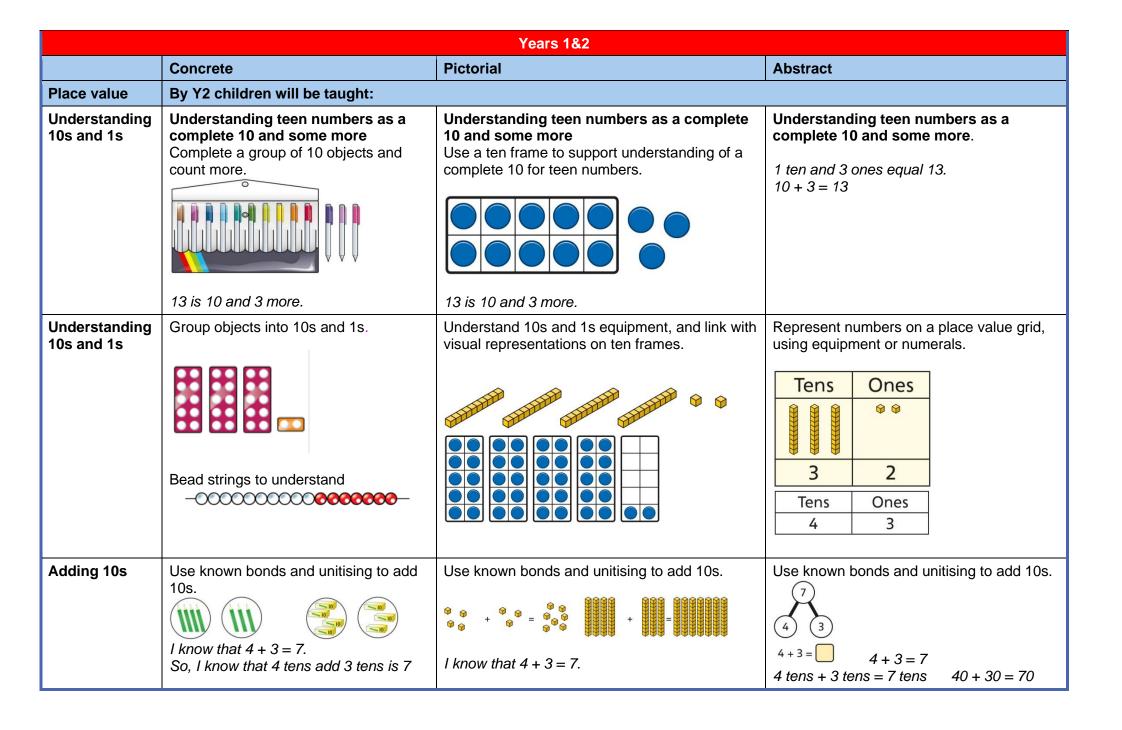

Rationale

It is our intent, based on school research and our study as part of the Jurassic Maths Hub, to enable KS1 children to develop the core ideas that underpin all calculation. They begin by connecting calculation with counting on and counting back, but they should learn that understanding wholes and parts will enable them to calculate efficiently and accurately, and with greater flexibility. They learn how to use an understanding of 10s and 1s to develop their calculation strategies, especially in addition and subtraction. Children develop an awareness of equal groups and link this with counting in equal steps, starting with 2s, 5s and 10s. In Year 2, they learn to connect the language of equal groups with the mathematical symbols for multiplication and division. They learn how multiplication and division can be related to repeated addition and repeated subtraction.

Key Vocabulary:

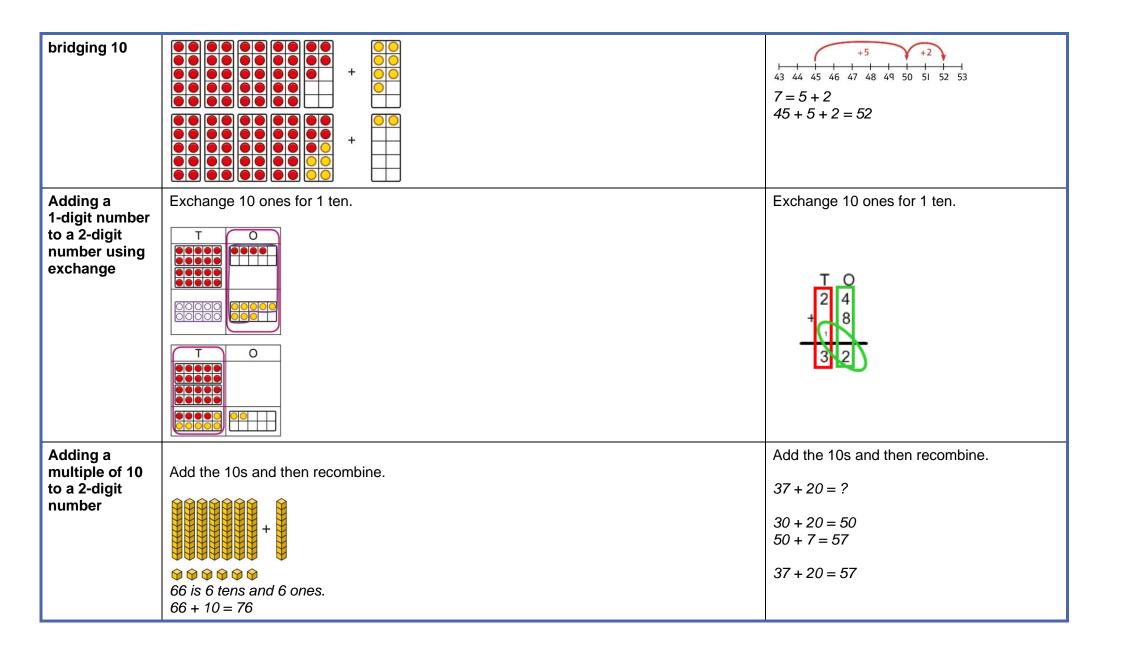

whole, part, ones, ten, tens, number bond, add, addition, plus, total, altogether, subtract, subtraction, find the difference, take away, minus, less, more, group, share, equal, equals, is equal to, groups, equal groups, times, multiply, multiplied by, divide, share, shared equally, times-table

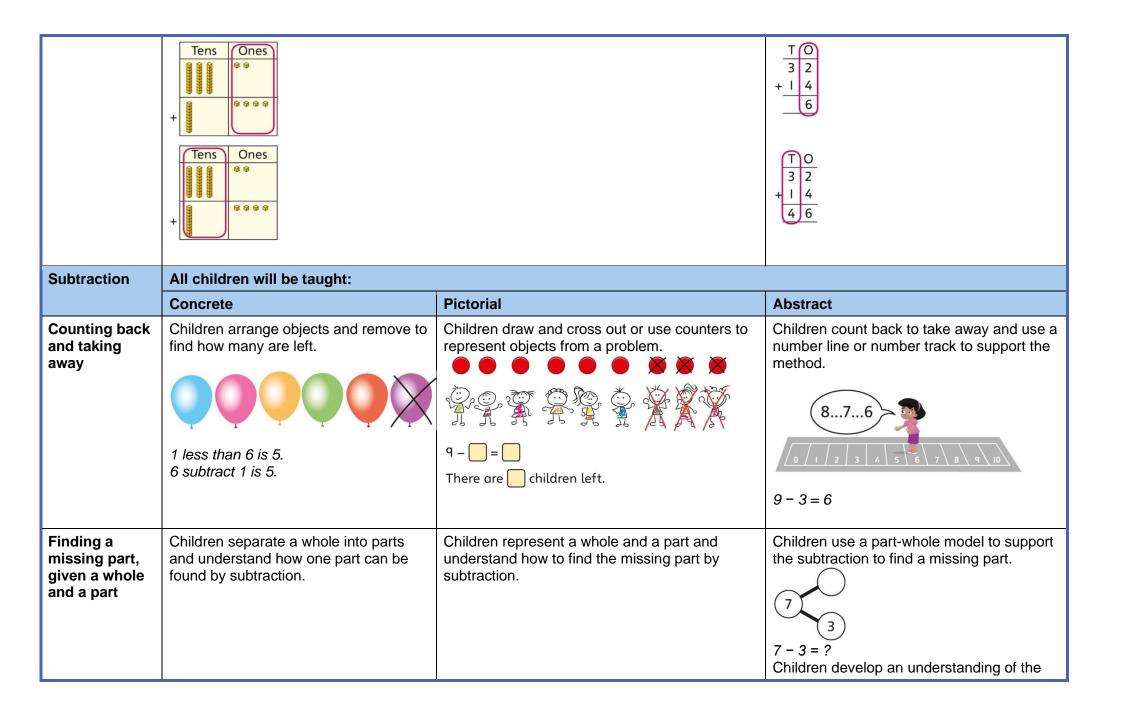

| | tens. | So, I know that 4 tens add 3 tens is 7 tens. | | |
|--|--|--|---|--|
| Addition | All children will be taught: | | | |
| | Concrete | Pictorial | Abstract | |
| Counting and adding more | Children add one more person or object to a group to find one more. | Children add one more cube or counter to a group to represent one more. | Use a number line to understand how to link counting on with finding one more. | |
| | Language: the number after, one more than Use of number line and dice one more | Numicon supports this area. One more than 4 is 5. | One more than 6 is 7. 7 is one more than 6. Learn to link counting on with adding more than one. $0 1 2 3 4 5 6 7 8 9 10$ $0 1 2 3 4 5 6 7 8 9 10$ $0 1 2 3 4 5 6 7 8 9 10$ $0 1 2 3 4 5 6 7 8 9 10$ | |
| Understanding part-part-whole relationship | Sort people and objects into parts and understand the relationship with the whole. The parts are 2 and 4. The whole is 6. | Children draw to represent the parts and understand the relationship with the whole. The parts are 1 and 5. The whole is 6. | Use a part-whole model to represent the numbers. 6 4 6+4=10 | |
| Knowing and finding number bonds within | Break apart a group and put back together to find and form number bonds. | Use five and ten frames to represent key number bonds. | Use a part-whole model alongside other representations to find number bonds. Make sure to include examples where one of the | |

| 10 | 7+3 = 10 | 5 = 4 + 1 | parts is zero. |
|--|---|--|---|
| | 7+3 | | 4+0=4 3+1=4 |
| Adding by counting on | Children use knowledge of counting to 20 to find a total by counting on using people or objects. | Children use counters to support and represent their counting on strategy. | Children use number lines or number tracks to support their counting on strategy. |
| | 8 on the bus | 7 on the bus | 7 + 5 = |
| Adding the 1s | Children use bead strings to recognise how to add the 1s to find the total efficiently. $2 + 3 = 5$ $12 + 3 = 15$ | calculations using ten frames to add a teen and 1s. $2 + 3 = 5$ $12 + 3 = 15$ | Children recognise that a teen is made from a 10 and some 1s and use their knowledge of addition within 10 to work efficiently. $3+5=8$ So, $13+5=18$ |
| Bridging the 10 using number bonds | Children use a bead string to complete a 10 and understand how this relates to the addition. | Children use counters to complete a ten frame and understand how they can add using knowledge of number bonds to 10. | Use a number line to support the calculation. 9 10 11 12 13 |

| | 7 add 3 makes 10. So, 7 add 5 is 10 and 2 more. | | 9 + 4 = 13 |
|---|---|----------------|---|
| Adding a 1-digit number to a 2-digit number not bridging a 10 | Add the 1s to find the total. Use known bonds within 10. 41 is 4 tens and 1 one. 41 add 6 ones is 4 tens and 7 ones. This can also be done in a place value grid. | Add the 1s. + | Add the 1s. Understand the link between counting on and using known number facts. Children should be encouraged to use known number bonds to improve efficiency and accuracy. 30 31 32 33 34 35 36 37 38 39 40 This can be represented horizontally or vertically. 34 + 5 = 39 or T O 3 4 + 5 9 |
| Adding a 1-digit number to a 2-digit number | Complete a 10 using number bonds. | | Complete a 10 using number bonds. |

| Adding a multiple of 10 to a 2-digit number using columns | Add the 10s using base 10 and a place of the second of the | value grid to support. | Add the 10s represented vertically. Children must understand how the method relates to unitising of 10s and place value. $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$ |
|---|--|--|--|
| Adding two 2-digit numbers | Add the 10s and 1s separately. $5 + 3 = 8$ There are 8 ones in total. $3 + 2 = 5 (3 \text{ tens} + 2 \text{ tens})$ There are 5 tens in total. $35 + 23 = 58$ | Add the 10s and 1s separately. Use a part-whole model to support. Use place value achart and base 10 to support $11 = 10 + 1$ $32 + 10 = 42$ $42 + 1 = 43$ $32 + 11 = 43$ | Add the 10s and the 1s separately, bridging 10s where required. A number line can support the calculations. To the calculations are th |
| Adding two 2-digit numbers using a place value grid | Add the 1s. Then add the 10s. | | Add the 1s. Then add the 10s. |

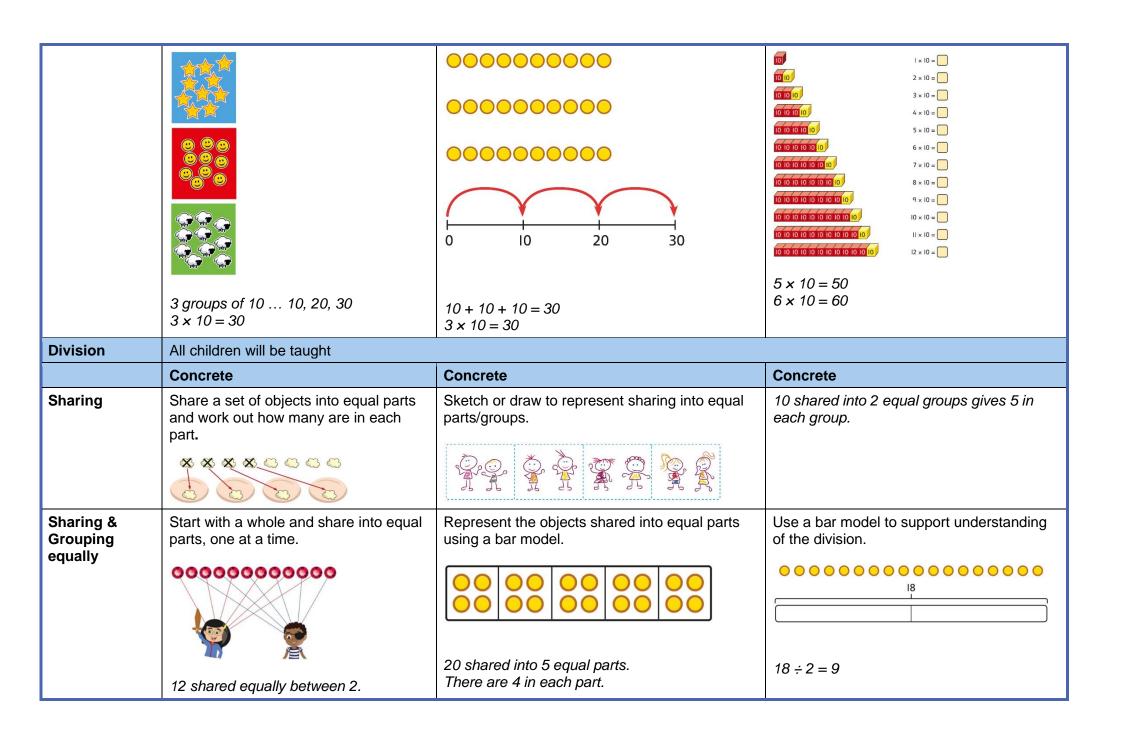

| | 8 - 5 = ? | 5 - 4 = | relationship between addition and subtraction facts in a part-whole model. |
|---------------------------|--|--|--|
| Finding the difference | Arrange two groups so that the difference between the groups can be worked out. **Page 1.5 | Represent objects using sketches or counters to support finding the difference. $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$ | Children understand 'find the difference' as subtraction. O I 2 3 4 5 6 7 8 9 10 10 - 4 = 6 The difference between 10 and 6 is 4. |
| Subtraction within 20 | Understand when and how to subtract 1s efficiently. Use a bead string to subtract 1s efficiently. $5-3=2$ $15-3=12$ | Understand when and how to subtract 1s efficiently. Output $5-3=2$ $15-3=12$ | Understand how to use knowledge of bonds within 10 to subtract efficiently. $5 - 3 = 2$ $15 - 3 = 12$ |
| Subtracting 10s and 1s | For example: 18 – 12 Subtract 12 by first subtracting the 10, then the remaining 2. | For example: 18 – 12 Use ten frames to represent the efficient method of subtracting 12. | Use a part-whole model to support the calculation. 19 - 14 |

| | First subtract the 10, then take away 2. | First subtract the 10, then subtract 2. | 19 - 10 = 9 9 - 4 = 5 So, 19 - 14 = 5 |
|---|---|--|--|
| Subtraction bridging 10 using number bonds | For example: 12 – 7 Arrange objects into a 10 and some 1s, then decide on how to split the 7 into parts. 7 is 2 and 5, so I take away the 2 and then the 5. | Represent the use of bonds using ten frames. For 13 – 5, I take away 3 to make 10, then take away 2 to make 8. | Use a number line and a part-whole model to support the method. 13 - 5 -2 -3 5 6 7 8 9 10 II 12 13 |
| Subtracting multiples of 10 | Use known number bonds and unitising to subtract multiples of 10. 8 subtract 6 is 2. So, 8 tens subtract 6 tens is 2 tens. | Use known number bonds and unitising to subtract multiples of 10. 100 30 10 - 3 = 7 So, 10 tens subtract 3 tens is 7 tens. | Use known number bonds and unitising to subtract multiples of 10. 7 2 5 20 50 If I know that 7-5=2 then I know that 70-50=20 |
| Subtracting a single-digit number bridging 10 | Bridge 10 by using known bonds. | Bridge 10 by using known bonds. | Bridge 10 by using known bonds. -4 16 17 18 19 20 21 22 23 24 25 26 |

| | 05 0 | 05 0 | 24 2 2 |
|---|---|--|---|
| | 35 – 6 | 35 - 6 | 24 - 6 = ? |
| | I took away 5 counters, then 1 more. | First, I will subtract 5, then 1. | 24 - 4 - 2 = ? |
| Subtracting a 2-digit number | Subtract by taking away. | Subtract the 10s and the 1s. | Subtract the 10s and the 1s. |
| | 0000000000 0000000000 000000000 0000000 | This can be represented on a 100 square. 1 | This can be represented on a number line. -10 -10 -10 -10 -10 -10 -10 -10 -10 -1 |
| | 61 – 18 I took away 1 ten and 8 ones. | 61 62 63 64 65 66 67 68 69 70 71 72 73 74 75 76 77 78 79 80 81 82 83 84 85 86 87 88 89 90 91 92 93 94 95 96 97 98 99 100 68-26 | 64 - 41 = 23 $21 26 36 46$ $46 - 20 = 26$ $26 - 5 = 21$ $46 - 25 = 21$ |
| Multiplication | All children will be taught | | |
| | Concrete | Pictorial | Abstract |
| Recognising and making equal groups | Children arrange objects in equal and unequal groups and understand how to recognise whether they are equal. A B C | Children draw and represent equal and unequal groups. A B A A A A A A A A A A A A A A A A A | Three equal groups of 4. Four equal groups of 3. |
| Equal groups and repeated | Recognise equal groups and write as repeated addition and as multiplication. | Recognise equal groups using standard objects such as counters and write as repeated addition | Use a number line and write as repeated addition and as multiplication. |

| addition | | and multiplication. | |
|--|---|---|--|
| Finding the total of equal groups by counting in 2s, 5s and 10s | 3 groups of 5 chairs 15 chairs altogether | 3 groups of 5 15 in total Counting in 2s, 5s and 10s | $ \begin{array}{cccccccccccccccccccccccccccccccccccc$ |
| Using arrays to represent multiplication and support understanding | Understand the relationship between arrays, multiplication and repeated addition. 4 groups of 5 | Understand the relationship between arrays, multiplication and repeated addition. 4 groups of 5 5 groups of 5 | Understand the relationship between arrays, multiplication and repeated addition. $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$ |
| Understanding commutativity | Use arrays to visualise commutativity. October 1 can see 6 groups of 3. I can see 3 groups of 6. | Form arrays using counters to visualise commutativity. Rotate the array to show that orientation does not change the multiplication. This is 2 groups of 6 and also 6 groups of 2. | Use arrays to visualise commutativity. $4+4+4+4+4+4=20$ $5+5+5+5=20$ $4 \times 5 = 20 \text{ and } 5 \times 4 = 20$ |
| Learning ×2, ×5 and ×10 table facts | Develop an understanding of how to unitise groups of 2, 5 and 10 and learn corresponding times-table facts. | Understand how to relate counting in unitised groups and repeated addition with knowing key times-table facts. | Understand how the times-tables increase and contain patterns. |

| | They get 6 each. | | |
|---|--|--|--|
| | Understand how to make equal groups from a whole. | Understand the relationship between grouping and the division statements. | Understand how to relate division by grouping to repeated subtraction. |
| | | $12 \div 3 = 4$ $2 \div 4 = 3$ | |
| | 8 divided into 4 equal groups. There are 2 in each group. | 12 ÷ 6 = 2 | 0 1 2 3 4 5 6 7 8 9 10 11 12 There are 4 groups now. |
| | | 12 ÷ 2 = 6 | 12 divided into groups of 3. $12 \div 3 = 4$ |
| Using known times-tables to solve divisions | Understand the relationship between multiplication facts and division. | Link equal grouping with repeated subtraction and known times-table facts to support division. | There are 4 groups. Relate times-table knowledge directly to division. |
| soive divisions | | 40 divided by 4 is 10. | $1 \times 10 = 10$ $2 \times 10 = 20$ $3 \times 10 = 30$ $4 \times 10 = 40$ $5 \times 10 = 50$ I used the 10 times-table to help me. |
| | | Use a bar model to support understanding of the link between times-table knowledge and | 6 × 10 = 60 7 × 10 = 70 8 × 10 = 80 |
| | 4 groups of 5 cars is 20 cars in total. 20 divided by 4 is 5. | division. | I know that 3 groups of 10 makes 30, so I know that 30 divided by 10 is 3. |
| | | 10 10 | $3 \times 10 = 30$ so $30 \div 10 = 3$ |
