

Tedburn St Mary Primary School: Number & Calculation policy: Years 5&6

Rationale:

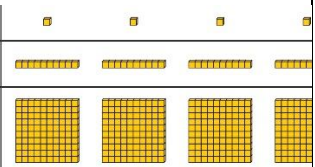

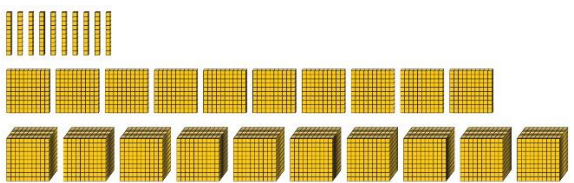

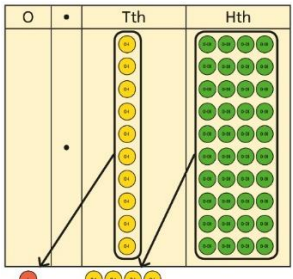

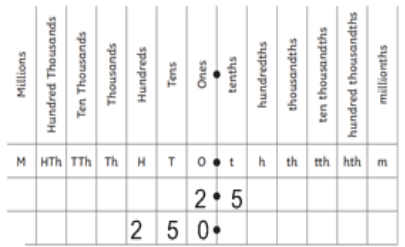

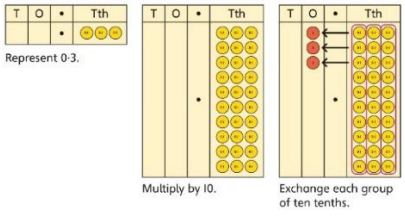

It is our intent, based on school research and our study as part of the Jurassic Maths Hub, to provide children with clear methods and strategies in order to build secure foundations in calculation. In Years 5 & 6 children will continue to develop fluency, accuracy and an ability to select appropriate and efficient methods when using the four operations: $+$ $-$ \times \div . Children in these year groups will work with whole numbers and decimals; applying skills to problem solving, reasoning their choices with confidence.

Staff will begin units of work with an elicitation task. These tasks will include 3 questions; fluency, reasoning and problem solving being at the heart of these tasks. These tasks will provide staff with a clear picture of children's knowledge and skills and then allow staff to meet need and extend children's learning from their individual starting points. They will be used again at the end of a unit of work, enabling staff to see a clear picture of progress and mastery of given areas.

Key Vocabulary:

round, decimal, column methods, exchange, partition, mental method, ten thousand, hundred thousand, million, factor, multiple, prime number, square number, cube number

Years 5&6

	Concrete	Pictorial	Abstract						
Place value									
Multiplying by 10, 100 and 1,000	<p>Use place value equipment to multiply by 10, 100 and 1,000 by unitising.</p> <p>$4 \times 1 = 4 \text{ ones} = 4$</p> <p>$4 \times 10 = 4 \text{ tens} = 40$</p> <p>$4 \times 100 = 4 \text{ hundreds} = 400$</p> 	<p>Understand the effect of repeated multiplication by 10.</p> 	<p>Understand how exchange relates to the digits when multiplying by 10, 100 and 1,000.</p> <table border="1" data-bbox="1534 406 1915 542"> <tr> <td>H</td> <td>T</td> <td>O</td> </tr> <tr> <td></td> <td>1</td> <td>7</td> </tr> </table> <p>$17 \times 10 = 170$ $17 \times 100 = 17 \times 10 \times 10 = 1,700$ $17 \times 1,000 = 17 \times 10 \times 10 \times 10 = 17,000$</p>	H	T	O		1	7
H	T	O							
	1	7							
Multiplying decimals by 10, 100 and 1,000	<p>Use place value equipment to explore and understand the exchange of 10 tenths, 10 hundredths or 10 thousandths.</p>	<p>Represent multiplication by 10 as exchange on a place value grid.</p>  <p>$0.14 \times 10 = 1.4$</p>	<p>Understand how this exchange is represented on a place value chart.</p>  <p>$2.5 \times 10 =$</p>						
Multiplying by 10, 100 and 1,000	<p>Use place value equipment to explore exchange in decimal multiplication.</p>  <p>Represent 0.3.</p> <p>Multiply by 10.</p> <p>Exchange each group of ten tenths.</p>	<p>Understand how the exchange affects decimal numbers on a place value grid.</p>	<p>Use knowledge of multiplying by 10, 100 and 1,000 to multiply by multiples of 10, 100 and 1,000.</p> <p>$8 \times 100 = 800$ $8 \times 300 = 800 \times 3 = 2,400$</p> <p>$2.5 \times 10 = 25$ $2.5 \times 20 = 2.5 \times 10 \times 2$</p>						

$0.3 \times 10 = ?$
 0.3 is 3 tenths.
 10×3 tenths are 30 tenths.
 30 tenths are equivalent to 3 ones.

$0.3 \times 10 = 3$

$= 50$

Dividing whole numbers by 10, 100 and 1,000

Use place value equipment to support unitising for division.

$4,000 \div 1,000$

$4,000$ is 4 thousands.
 $4 \times 1,000 = 4,000$
 So, $4,000 \div 1,000 = 4$

Use a bar model to support dividing by unitising.

$380 \div 10 = 38$

380 is 38 tens.
 $38 \times 10 = 380$
 $10 \times 38 = 380$
 So, $380 \div 10 = 38$

Understand how and why the digits change on a place value grid when dividing by 10, 100 or 1,000.

Th	H	T	O
3	2	0	0

$3,200 \div 100 = ?$

$3,200$ is 3 thousands and 2 hundreds.
 $200 \div 100 = 2$
 $3,000 \div 100 = 30$
 $3,200 \div 100 = 32$

So, the digits will move two places to the right.

Dividing by multiples of 10, 100 and 1,000

Use place value equipment to represent known facts and unitising.

15 ones put into groups of 3 ones.
 There are 5 groups.
 $15 \div 3 = 5$

Represent related facts with place value equipment when dividing by unitising.

180 is 18 tens.
 18 tens divided into groups of 3 tens. There are

Reason from known facts, based on understanding of unitising. Use knowledge of the inverse relationship to check.

$3,000 \div 5 = 600$
 $3,000 \div 50 = 60$
 $3,000 \div 500 = 6$

$5 \times 600 = 3,000$
 $50 \times 60 = 3,000$
 $500 \times 6 = 3,000$

15 tens put into groups of 3 tens. There are 5 groups.

$$150 \div 30 = 5$$

6 groups.

$$180 \div 30 = 6$$

12 ones divided into groups of 4. There are 3 groups.

12 hundreds divided into groups of 4 hundreds. There are 3 groups.

$$1200 \div 400 = 3$$

Use knowledge of factors to divide by multiples of 10, 100 and 1,000.

$$40 \div 50 = \square$$

$$40 \rightarrow \boxed{\div 10} \rightarrow \boxed{\div 5} \rightarrow ?$$

$$40 \rightarrow \boxed{\div 5} \rightarrow \boxed{\div 10} \rightarrow ?$$

$$40 \div 5 = 8$$

$$8 \div 10 = 0.8$$

$$\text{So, } 40 \div 50 = 0.8$$

Dividing decimals by 10, 100 and 1,000

Understand division by 10 using exchange.

2 ones are 20 tenths.

20 tenths divided by 10 is 2 tenths.

Use place value equipment to explore division as exchange.

Exchange each 0.1 for ten 0.01s.

Divide 20 counters by 10.

0.2 is 2 tenths.

2 tenths is equivalent to 20 hundredths.

20 hundredths divided by 10 is 2 hundredths.

Represent division using exchange on a place value grid.

1.5 is 1 one and 5 tenths.

This is equivalent to 10 tenths and 50 hundredths.

10 tenths divided by 10 is 1 tenth.

50 hundredths divided by 10 is 5 hundredths.

1.5 divided by 10 is 1 tenth and 5 hundredths.

$$1.5 \div 10 = 0.15$$

Understand the movement of digits on a place value grid.

Millions	Hundred Thousands	Ten Thousands	Thousands	Hundreds	Tens	Ones	tenths	hundredths	thousandths	ten thousandths	hundred thousandths	millionths
M	HTh	TTh	Th	H	T	O	t	h	th	tth	hth	m
						0	8	5				
						0	0	8	5			

$$0.85 \div 10 = 0.085$$

Millions	Hundred Thousands	Ten Thousands	Thousands	Hundreds	Tens	Ones	tenths	hundredths	thousandths	ten thousandths	hundred thousandths	millionths
M	HTh	TTh	Th	H	T	O	t	h	th	tth	hth	m
						8	5					
						0	0	8	5			

$$8.5 \div 100 = 0.085$$

Round to the nearest 10 / 100 / 1000 / 10,000

TTh	Th	H	T	

use place value chart to round to the nearest 100, 1000, 10,000

Complete the table.

Start Number	Rounded to the nearest 10	Rounded to the nearest 100	Rounded to the nearest 1,000
DCCLXIX			

Round 85,617

- To the nearest 10
- To the nearest 100
- To the nearest 1,000
- To the nearest 10,000

Round to the nearest 10 / 100 / 1000 / 10,000

Addition

**All children will be taught: column addition
Place value equipment will be used to represent additions and support mathematics where necessary**

Column addition with whole numbers

Use place value equipment to represent additions.

$$\begin{array}{r} 5 & 6 & 7 & 8 \\ + & 1 & 2 & 3 & 5 \\ \hline & & & & 3 \end{array}$$

Y6: Comparing and selecting efficient methods

Adding decimals using column addition

Y6: Comparing and selecting efficient methods

Represent additions, using place value equipment on a place value grid alongside written methods.

Use column addition, including exchanges.

TTh	Th	H	T	O
1	9	1	7	5
	+	1	8	4
			+	1
				7
				2
				2

Add using a column method, ensuring that children understand the link with place value.

O	Tth	Hth
0	·	2 3
+	0	· 4 5
		0 · 6 8

O	Tth	Hth
0	·	9 2
+	0	· 1 3 3
		1 · 2 5

Include exchange where required, alongside an understanding of place value. Include additions where the numbers of decimal places are different.

O	Tth	Hth
3	·	4 0
+	0	· 6 5

$3.4 + 0.65 = ?$

Selecting mental methods for larger numbers where appropriate

Represent 7-digit numbers on a place value grid, and use this to support thinking and mental methods.

$2,411,301 + 500,000 = ?$

This would be 5 more counters in the HTh place.

So, the total is 2,911,301.

$2,411,301 + 500,000 = 2,911,301$

Use a bar model to support thinking in addition problems.

$257,000 + 99,000 = ?$

I added 100 thousands then subtracted 1 thousand.

257 thousands + 100 thousands = 357 thousands

$257,000 + 100,000 = 357,000$

$357,000 - 1,000 = 356,000$

So, $257,000 + 99,000 = 356,000$

Use place value and unitising to support mental calculations with larger numbers.

$195,000 + 6,000 = ?$

$195 + 5 + 1 = 201$

195 thousands + 6 thousands = 201 thousands

So, $195,000 + 6,000 = 201,000$

Understanding order of operations in calculations

Use equipment to model different interpretations of a calculation with more than one operation. Explore different results.

$3 \times 5 - 2 = ?$

$3 \times (5 - 2)$
↓ ↓
 $3 \times 3 = 9$

$(3 \times 5) - 2$
↓ ↓
 $15 - 2 = 13$

Model calculations using a bar model to demonstrate the correct order of operations in multi-step calculations.

This can be written as: $16 \times 4 + 16 \times 6$
 $64 + 96 = 160$

Understand the correct order of operations in calculations without brackets.

Understand how brackets affect the order of operations in a calculation.

$4 + 6 \times 16$
 $4 + 96 = 100$

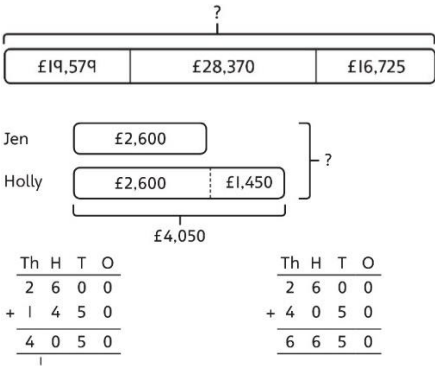

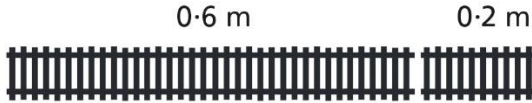

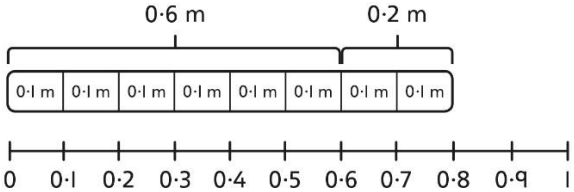

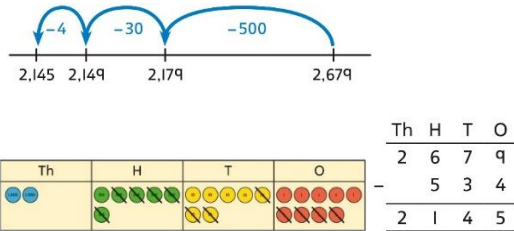

$(4 + 6) \times 16$
 $10 \times 16 = 160$

Other representations and methods may include:

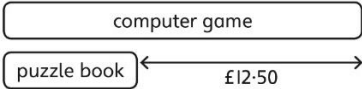

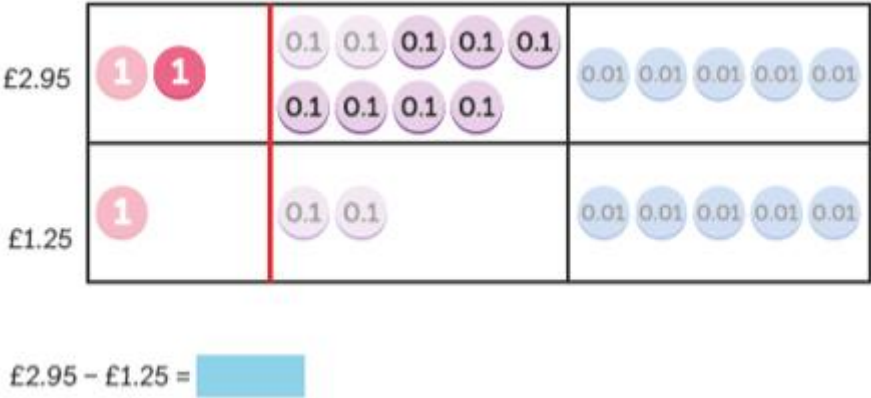

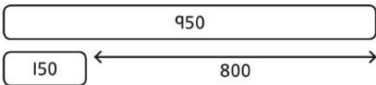

Representing additions

Bar models represent addition of two or more numbers in the context of problem solving.

Use approximation to check whether answers are reasonable.

			<table border="0" style="width: 100%;"> <tr> <td style="text-align: right;">TTh Th H T O</td> <td style="text-align: right;">TTh Th H T O</td> </tr> <tr> <td style="text-align: right;">2 3 4 0 5</td> <td style="text-align: right;">2 3 4 0 5</td> </tr> <tr> <td style="text-align: right;">+ 7 8 9 2</td> <td style="text-align: right;">+ 1 7 8 9 2</td> </tr> <tr> <td style="text-align: right;">-----</td> <td style="text-align: right;">-----</td> </tr> <tr> <td style="text-align: right;">2 0 2 9 7</td> <td style="text-align: right;">3 1 2 9 7</td> </tr> </table> <p><i>I will use 23,000 + 8,000 to check.</i></p>	TTh Th H T O	TTh Th H T O	2 3 4 0 5	2 3 4 0 5	+ 7 8 9 2	+ 1 7 8 9 2	-----	-----	2 0 2 9 7	3 1 2 9 7

I calculated 18,000 + 4,000 mentally to check my subtraction.

Choosing efficient methods

To subtract two large numbers that are close, children find the difference by counting on.
 $2,002 - 1,995 = ?$

Use addition to check subtractions.
I calculated $7,546 - 2,355 = 5,191$.
I will check using the inverse.

Multiplication

By year 5: All children should know or learn all multiplication facts to 12x12. Where they don't this will be taught and given as home learning.

All children will be taught: short and long multiplication methods

Multiplying up to 4-digit numbers by a single digit

By Y6 use place value & equipment to compare methods

Use an area model and then add the parts.

Use a column multiplication, including any required exchanges.

By Y6 use efficient strategies

Multiplying 2-digit numbers by 2-digit numbers

Use column multiplication, ensuring understanding of place value at each stage.

$$\begin{array}{r}
 34 \\
 \times 27 \\
 \hline
 238 \\
 680 \\
 \hline
 918
 \end{array}$$

$34 \times 27 = 918$

Multiplying up to 4-digits by 2-digits

Use column multiplication, ensuring understanding of place value at each stage.

$$\begin{array}{r}
 143 \\
 \times 12 \\
 \hline
 286 \\
 1430 \\
 \hline
 1716
 \end{array}$$

$143 \times 12 = 1716$

$$\begin{array}{r}
 1274 \\
 \times 32 \\
 \hline
 2548 \\
 38220 \\
 \hline
 40768
 \end{array}$$

$1274 \times 32 = 40768$

Multiplying decimals

Use known facts to multiply decimals.

$4 \times 3 = 12$
 $4 \times 0.3 = 1.2$
 $4 \times 0.03 = 0.12$

$20 \times 5 = 100$
 $20 \times 0.5 = 10$
 $20 \times 0.05 = 1$

Find families of facts from a known multiplication.

I know that $18 \times 4 = 72$.

$2 \times 3 =$

$2 \times 0.3 =$

	Millions	Hundred Thousands	Ten Thousands	Thousands	Hundreds	Tens	Ones	tenths	hundredths	thousandths	ten thousandths	hundred thousandths	millionths
	M	HTh	TTh	Th	H	T	O	t	h	th	tth	hth	m
$2 \times 3 =$							6						
$2 \times 0.3 =$							0	6					

This can help me work out:

$$1.8 \times 4 = ?$$
$$18 \times 0.4 = ?$$
$$180 \times 0.4 = ?$$
$$18 \times 0.04 = ?$$

Use a place value grid to understand the effects of multiplying decimals.

Other representations and methods may include:

Understanding factors

Use Cuisenaire, cubes or counters to explore the meaning of 'square numbers'.

25 is a square number because it is made from 5 rows of 5.

Use cubes to explore cube numbers.

8 is a cube number.

Use images to explore examples and non-examples of square numbers.

$$8 \times 8 = 64$$
$$8^2 = 64$$

Understand the pattern of square numbers in the multiplication tables.

Use a multiplication grid to circle each square number. Can children spot a pattern?

Use a known fact to generate families of related facts.

Use factors to calculate efficiently.

$$15 \times 16$$
$$= 3 \times 5 \times 2 \times 8$$
$$= 3 \times 8 \times 2 \times 5$$
$$= 24 \times 10$$
$$= 240$$

Understanding factors

Use equipment to explore different factors of a number.

Recognise prime numbers as numbers having exactly two factors. Understand the link with division and remainders.

Recognise and know primes up to 100. Understand that 2 is the only even prime, and that 1 is not a prime number.

$24 \div 4 = 6$

$30 \div 4 = 7 \text{ remainder } 2$

4 is a factor of 24 but is not a factor of 30.

$17 \div 2 = 8 \text{ r } 1$

$17 \div 3 = 5 \text{ r } 2$

$17 \div 4 = 4 \text{ r } 1$

$17 \div 5 = 3 \text{ r } 2$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50

Division All children will be taught: short and long division methods

Dividing up to four digits by a single digit using short division

Explore grouping using place value equipment.

$268 \div 2 = ?$

There is 1 group of 2 hundreds.
There are 3 groups of 2 tens.
There are 4 groups of 2 ones.

Dividing decimals

$264 \div 2 = 134$

Understanding inverse operations and the link with multiplication & division

Use place value equipment on a place value grid alongside short division. The model uses grouping. A sharing model can also be used, although the model would need adapting.

Lay out the problem as a short division.

There is 1 group of 4 in 4 tens.
There are 2 groups of 4 in 8 ones.

Work with divisions that require exchange.

Use short division for up to 4-digit numbers divided by a single digit.

$$\begin{array}{r} 0556 \\ 7 \overline{) 3894} \end{array}$$

$3,892 \div 7 = 556$

Use multiplication to check.

$556 \times 7 = ?$

$6 \times 7 = 42$
 $50 \times 7 = 350$
 $500 \times 7 = 3500$

$3,500 + 350 + 42 = 3,892$

Use short division to divide decimals with up to 2 decimal places.

		<p>4 $\overline{) 92}$</p> <p>2 4 $\overline{) 9} 2$</p> <p>2 4 $\overline{) 9} 2$</p> <p>2 3 4 $\overline{) 9} 2$</p> <p>First, lay out the problem.</p> <p>How many groups of 4 go into 9 tens? 2 groups of 4 tens with 1 ten left over.</p> <p>Exchange the 1 ten left over for 10 ones. We now have 12 ones.</p> <p>How many groups of 4 go into 12 ones? 3 groups of 4 ones.</p>	<p>8 $\overline{) 424}$</p> <p>0 .</p> <p>8 $\overline{) 42} 4$</p> <p>0 . 5</p> <p>8 $\overline{) 42} 24$</p> <p>0 . 5 3</p> <p>8 $\overline{) 42} 24$</p>
<p>Understanding remainders</p>	<p>Understand remainders using concrete versions of a problem.</p> <p><i>80 cakes divided into trays of 6.</i></p> <p><i>80 cakes in total. They make 13 groups of 6, with 2 remaining.</i></p>	<p>Use short division and understand remainders as the last remaining 1s.</p> <p>6 $\overline{) 820}$</p> <p>1 6 $\overline{) 8} 20$</p> <p>1 3 r 2 6 $\overline{) 8} 20$</p> <p>Lay out the problem as short division.</p> <p>How many groups of 6 go into 8 tens? There is 1 group of 6 tens. There are 2 tens remaining.</p> <p>How many groups of 6 go into 20 ones? There are 3 groups of 6 ones. multiplication & division

$$377 \div 13 = 29$$

$$\begin{array}{r}
 13 \overline{) 377} \\
 - 130 \quad (10) \\
 \hline
 247 \\
 - 130 \quad (10) \\
 \hline
 117 \\
 - 117 \quad (9) \\
 \hline
 0 \quad 29
 \end{array}$$

- 1 x 13 = 13
- 2 x 13 = 26
- 3 x 13 = 39
- 4 x 13 = 52
- 5 x 13 = 65

$$377 \div 13 = 29$$

Divisions with a remainder explored in problem-solving contexts.

Other representations and methods may include:

Understanding the relationship between fractions and division

Use sharing to explore the link between fractions and division.

*1 whole shared between 3 people.
Each person receives one-third.*

Use a bar model and other fraction representations to show the link between fractions and division.

$$1 \div 3 = \frac{1}{3}$$

Use the link between division and fractions to calculate divisions.

$$5 \div 4 = \frac{5}{4} = 1\frac{1}{4}$$

$$11 \div 4 = \frac{11}{4} = 2\frac{3}{4}$$
